PROFILE

I work as a frontend developer using mainly the technologies mainly the technologies that JavaScript provides us, both client-side and server-side, always client-side and server-side, always following clean and scalable architectures hand in hand with modern designs.

WORK EXPERIENCE

Sipremcol SAS
Fullstack Developer.   *2022 - Present*

As a frontend developer my main focus was to work on the development and improvement of functionalities for existing applications, as well as to participate in the creation of new projects from scratch. During my role, I established a close communication with clients to understand their requirements and expectations, with the goal of delivering an elaborated and quality final product.

Draco Servicios
Developer Jr.   *2021 – 2022*

As a Jr. developer my main responsibility was to perform the layout of courses and provide them with the necessary functionality. This involved transforming the visual design and structure of the online courses into HTML and CSS code, ensuring an attractive and consistent presentation. In addition, I was in charge of implementing the required interactivity and functionality in the courses, using technologies such as JavaScript.
